The Engineer presented the Trustees with a written report, which included the following:

1. The Engineer reported on the District's participation in the Delta Levee Subventions Program, as follows:
 - A. Fiscal year 2018-19: The District submitted an application in the Program in the amount of \$500,000. DWR has indicated that \$12 million has been approved for program funding for FY 2018-19, consistent with recent years. The District's final claim has been submitted in the amount of \$276,982.97.

DWR and CDFW have performed their annual inspections and the claim is currently being processed.

- B. Fiscal year 2019-20: The District submitted an application in the Program in the amount of \$615,000. DWR has lowered the Program funding amount to \$10 million for FY 2019-20.
 - C. Fiscal year 2020-21: The District submitted an application in the amount of \$615,000. DWR has indicated the \$12 million is being committed to the Program for FY 2020-21.
2. Special Projects: The enhancement component of the Old River multi-benefit levee rehabilitation project is in progress. Maintenance activities will be on-going to promote plant health and longevity.

The District received a fully executed funding agreement for the design portion of the Directed Action project to rehabilitate the north and south levees. The District has requested an advance of funds from DWR. Work under this project is mostly on hold until the advance funds have been received.

- 3. Annual Maintenance: The Engineer presented the Trustees with a list of the maintenance items that the District is currently tracking.
- 4. Five Year Plan: Work on the Five-Year Plan is currently in progress. The Engineer will be distributing a draft for review and comment by the end of the month. The Plan must be completed by the end of 2020.
- 5. SB 88: MBK prepared a draft report to update last year's experiment summary report, which was provided to MWD for final review and will be finalized as soon as comments are received. Work under Phase 3 of the measurement experiment (Feb 2020 through Feb 2021) is underway, as outlined in the approved Request for Additional Time.
Phase 3 efforts primarily involve installing 8 additional flange magnetic meters on the water side of the highest use siphons, with at least one flow meter on each island. MBK conducted site visits to each of the proposed sites during April to check installation locations and pipe conditions. All proposed sites will include telemetry equipment, with the intent to post data to the Reclamation District websites for each island. MBK provided quotes for the new equipment to MWD for review.
The Delta Measurement Experiment Consortium has scheduled its next meeting for July 15, 2020. The meeting will include a presentation by the Delta Watermaster's office for a proposed work plan for the Consortium's development of a Delta-wide Alternative Compliance Plan. MBK has not received any updates on the status of the Open ET beta testing.

The Chair asked for Public Comment. There being no one present wishing to address the Board of Trustees, the Public Comment session was closed. There being no one wishing to address the Board, and there being no further business to come before the Board, the meeting was adjourned.
